

## What is DFARS?

DFARS – DEFENSE FEDERAL ACQUISITION REGULATION SUPPLEMENT

A supplement to the FAR that provides DoD-specific acquisition regulations that DoD government acquisition officials – and those contractors doing business with DoD – must follow in the procurement process for goods and services.

## Why DFARS?

All Department of Defense (DoD) contractors that process, store or transmit Controlled Unclassified Information (CUI) must meet the Defense Federal Acquisition Regulation Supplement (DFARS). The date for minimum security compliance was December 31, 2017. Contractors not in compliance risk losing their DoD contracts.

## For General Business:

Many general business organizations are using the U.S. Department Chamber of Commerce’s National Institute of Standards and Technology model, which also supports DFARS compliance. Twin State works across general industries in supporting management of cybersecurity risk.

## What can Twin State Technical Services do for you?

Assist with **compliance auditing, remediation planning, and implementation of remediation plans** pertaining to network and information system security. We can also offer penetration testing and vulnerability scanning before, during, and/or after remediation actions. We also support creation and writing of policies where undocumented practices are already in place in order to accommodate compliance requirements.

## Also available from Twin State are the following Compliance Aids:

- 800-171 Compliant Policy and Procedure Template....\$395
- Incident Response Plan Template....\$150
- System Security Plan Template .....\$150
